PRE PAID & SECURED CARDS

TURN EVERYDAY SPEND INTO EVERYDAY REVENUE

ZUM OS

www.zumrails.com

TAP INTO NEW REVENUE STREAMS AND DEEPEN CUSTOMER RELATIONSHIPS.

We have built all of the software around our card solution to allow extremely fast go-to-market dates.

You could be issuing cards by September!

Revenue Impact

- Earn new revenue through interchange and card-related fees.
- Monetize engagement via load, inactivity, and replacement fees.
- Introduce recurring card plans that drive predictable income.
- Boost retention by encouraging reloads and ongoing usage.

Customer Value

- Empower access for underbanked and credit-excluded users.
- Deliver instant payouts and seamless digital payment experience.
- Strengthen loyalty through your own branded card experience.
- Increase likelihood of repeat lending.

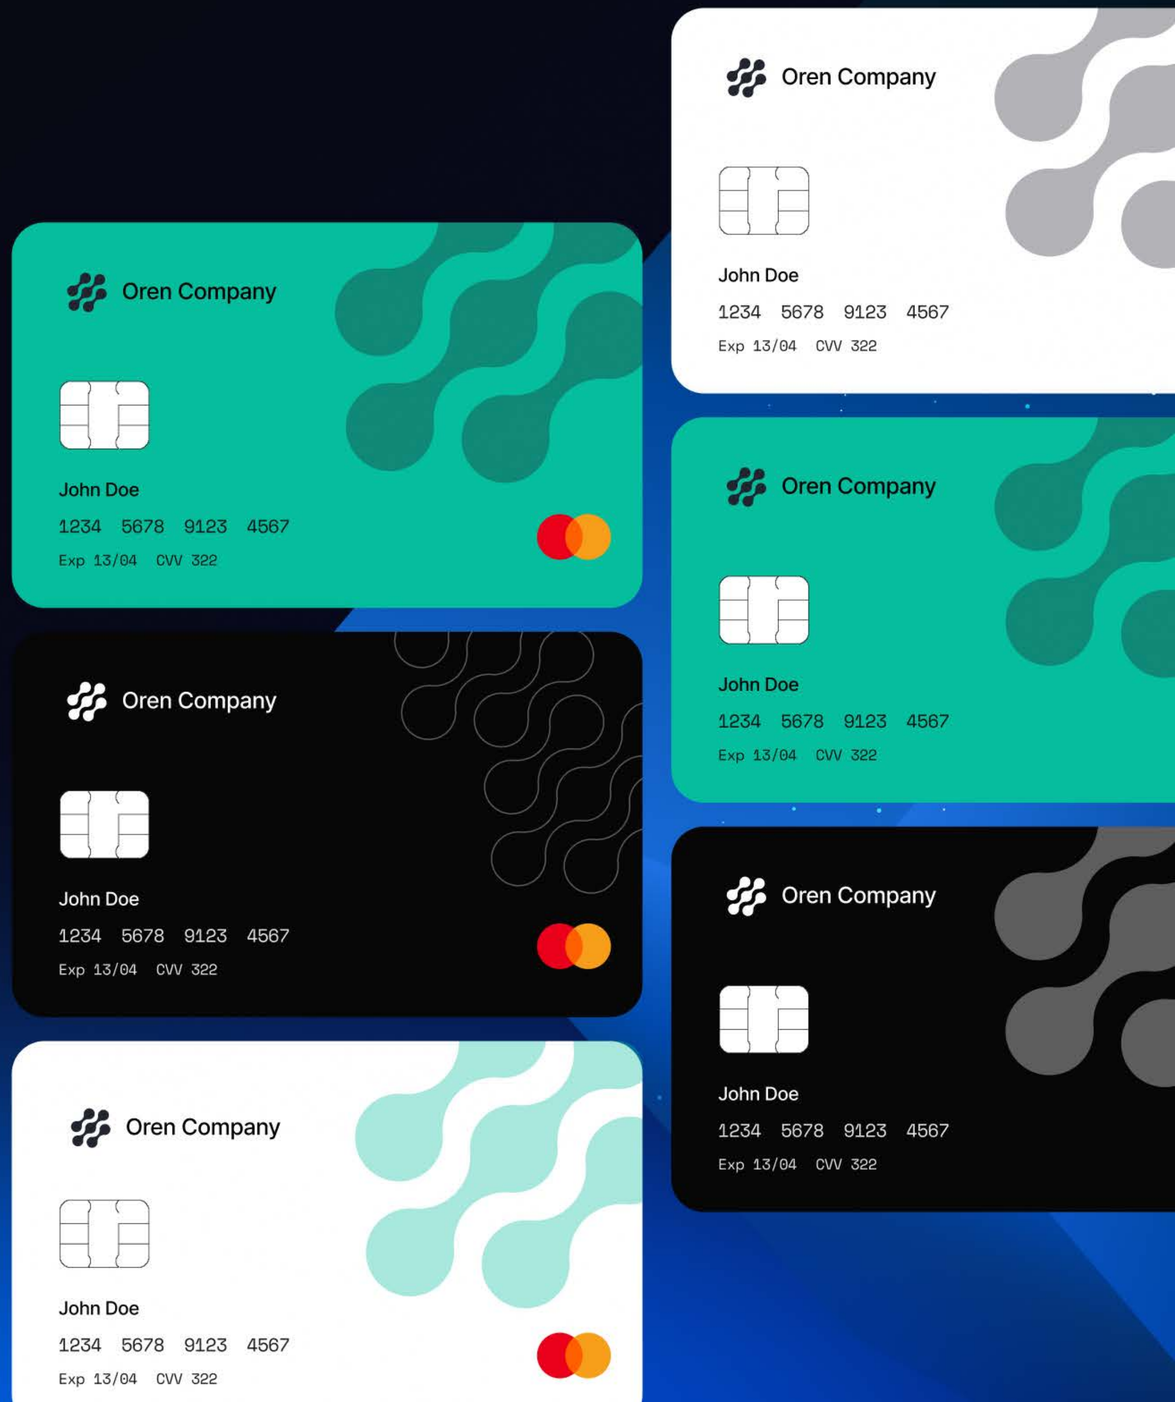
KEY FUNCTIONALITIES

Card Options
- Multi-card compatible with Apple Pay, Google Pay, Samsung Pay
- Physical cards fully branded with your logo and design

Program Support & Infrastructure
- Set up and maintenance: program setup, compliance updates (KYC, fraud, controls, etc.)
- Ongoing operational support

Cardholder Experience
- Dedicated portal for viewing transactions, disputing charges, reloading funds, or making payments
- Mobile app access with API layer for deeper integration

Interconnected Payments
- Linked to Zum Rails digital wallet and payment rails (ACH, Interac, A2A, Feedwire / Real-Time Rail)
- Enables account-to-card loads, card-to-account transfers, and more (real-time ledger updates)



ZUM OS +

ONE ECOSYSTEM. ENDLESS FLEXIBILITY.

Bring speed, control, and seamless user experiences together in a single connected platform.

Instant Integration
Use Zum's SDK to integrate into your experience - no need to be PCI compliant.

Customizable at Every Step
Partners choose how much control to retain, while still benefiting from Zum's infrastructure, tokenized data, and compliance coverage.

Unified KYC & Onboarding
Flexible flows allow KYC/KYB to be completed by Zum or your team, with instant attestation and compliance built-in.

Connected Data Everywhere
Real-time webhooks for onboarding, transactions, disbursements, and servicing events keep your ecosystem fully in sync.

Compliance in a Box
Built-in PCI DSS Level 1 certification and adherence to local regulatory frameworks ensure your entire payment ecosystem operates securely and compliantly—out of the box.

ZUM OS

PRE-BUILT CARDHOLDER EXPERIENCE

Easily direct your customers to a branded cardholder portal to increase speed-to-market:

Zum Cardholder Portal

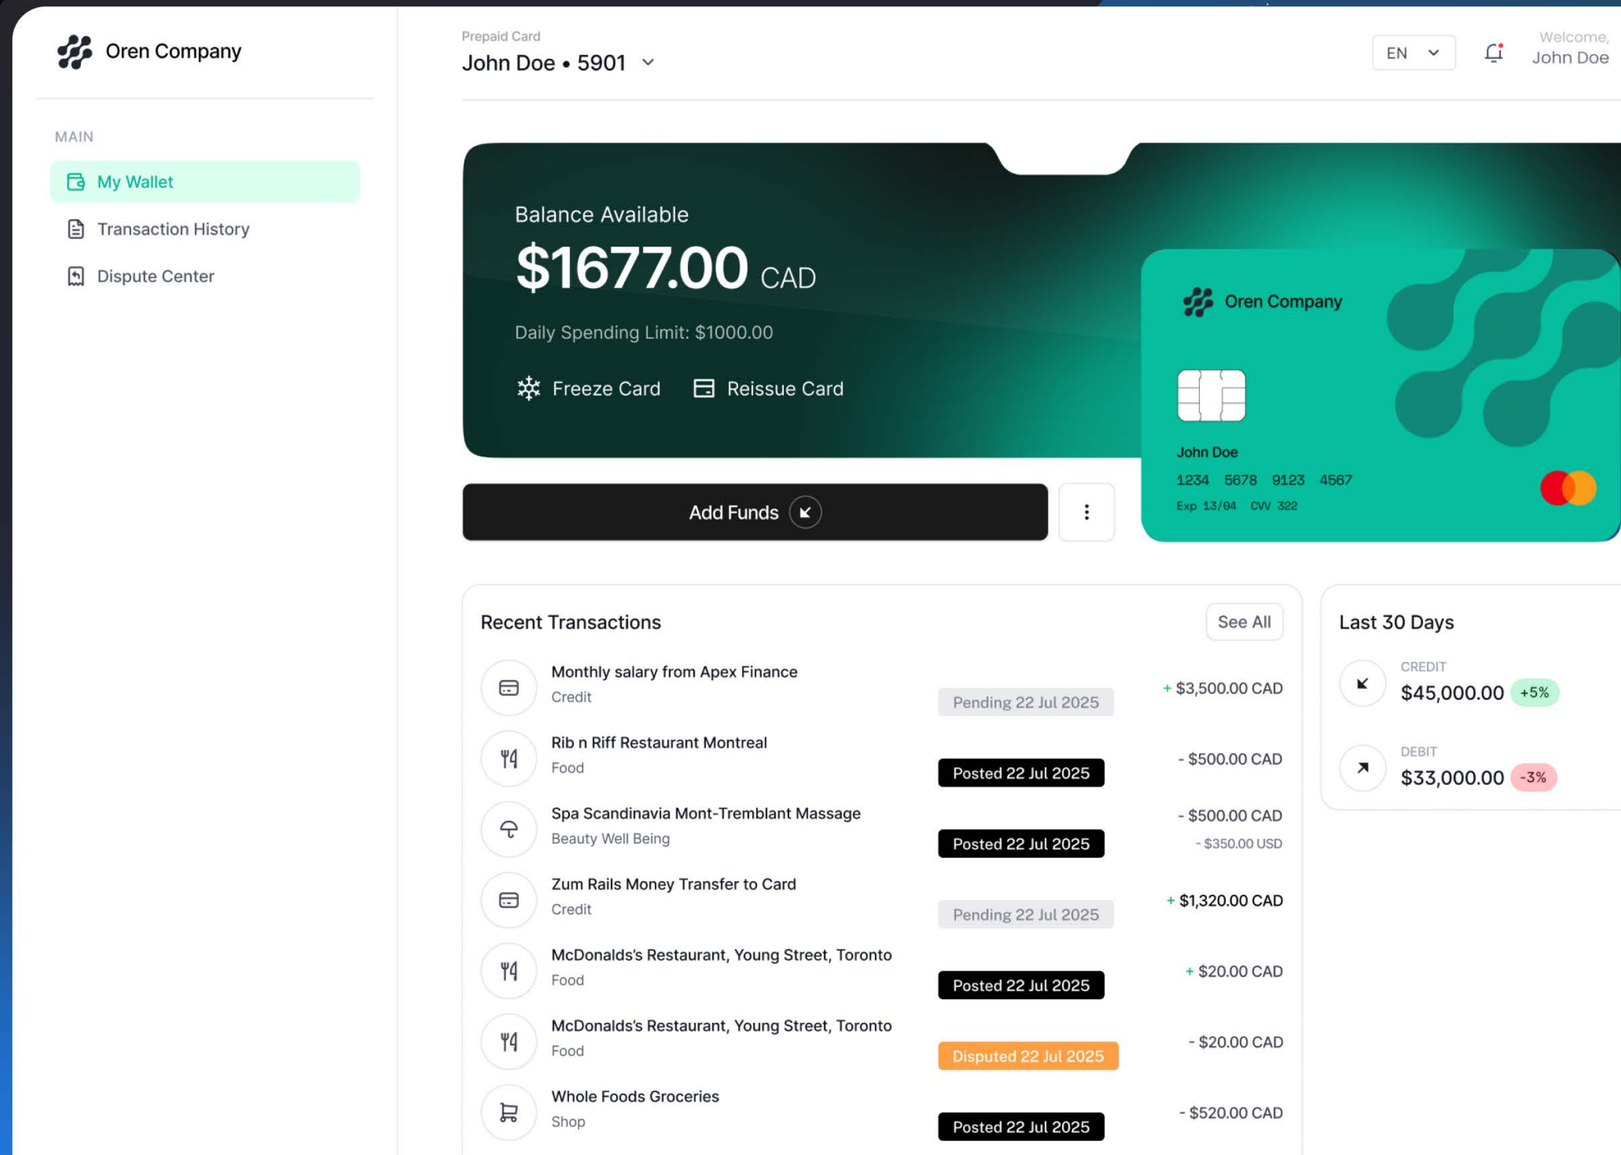
Cardholders can easily view card details, transaction history, available balance, and deposits, all in one place.

Self-Serve Features

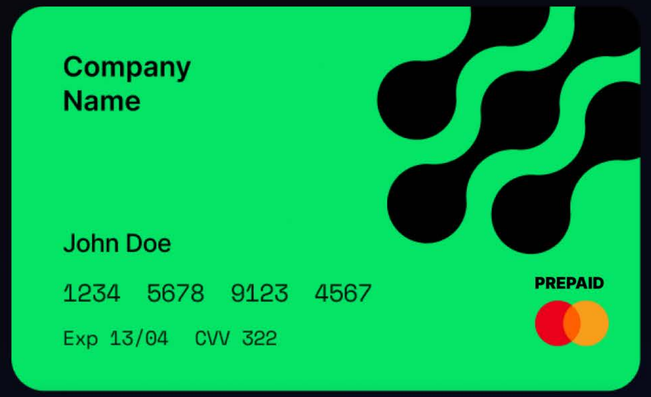
Report card lost/stolen, temporarily put a block on transactions, report fraud (initiate a chargeback). All in the effort of reducing the need for customer service — everything is available in a concise self-serve, already built, user interface.

Or...

Use our APIs and create a custom interface in your experience.

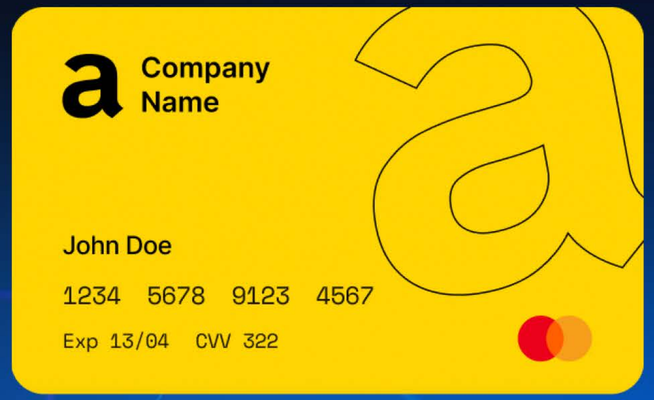


TYPE OF CARDS



Prepaid Cards

- Debit Cards with Real-Time Balances and Refresh
- Backed by pre-funded accounts, ensuring instant availability of funds and zero credit exposure.
- Usable for any purchase type—both in-store and online, including subscriptions and recurring payments.
- Reloadable via EFT, Interac, ACH, or card-to-card transfers, supporting flexible funding methods.
- Offers real-time spend controls, category restrictions, and automated reconciliation for businesses.



Secured Cards

- Credit Cards with Limits and APR.
- Backed by funds held in trust, with complete ledgering and full transparency for issuers.
- Monthly statements reported to credit bureaus, helping users build or rebuild credit responsibly.
- Flexible limits based on user deposits and performance, encouraging better credit habits.
- Ideal for lenders, fintechs, and credit-building programs targeting underserved or new-to-credit customers.
- Empowers financial inclusion by expanding access to credit tools for those previously excluded from traditional financial systems.
