🦋 WISDOM GIANTS LEAN CANVAS

Complete Written Canvas (SOLVE Team Dual-Engine Protocol v1.0)

Date: January 22, 2026

Project: Wisdom Giants

Stage: 🟦 Blue Sky (Ideation/Strategic)

Protocol: SOLVE Team Dual-Engine Protocol v1.0

PAGE 1: LEAN IMPACT CANVAS

1. PROBLEM 🟡 AMBER

Status: Partially validated, needs user research

The Three Gaps:

The Wisdom Gap: AI provides only information (fossilized intelligence - documented knowledge) but completely lacks lived experience (crystallized intelligence - wisdom from experience). Users get facts but not judgment, data but not discernment.

The Access Gap: Wisdom is currently expensive and exclusive. Professional coaching, mentorship, and advisory services cost hundreds to thousands of dollars. Underserved populations face a "cognitive tax of poverty" - they experience isolated panic instead of collective wisdom when facing life decisions.

The Economic Gap: Social entrepreneurs and mission-driven organizations face a false choice between profit or purpose. The market pressures them to choose: either maximize profit (and abandon mission) or serve purpose (and struggle financially).

Next Steps:

- Conduct 50+ user interviews to validate problem severity
- Quantify the cognitive tax (time, money, stress) on underserved populations
- Document specific decision scenarios where wisdom gap is most painful

---

2. CUSTOMER SEGMENTS 🟢 GREEN

Status: Clearly defined with priority hierarchy

Primary Segments:

1. **Universal Users** (ChatGPT-scale market)
   - Anyone with questions requiring both information and wisdom
   - Global market, all demographics
   - Use cases: Career decisions, relationships, health, finance, parenting
2. **Underserved Populations** (PRIORITY - 40%+ target)
   - Low-income individuals facing high-stakes decisions
   - First-generation immigrants navigating new systems
   - Rural communities with limited access to expertise
   - Youth without family support networks
   - Free tier ensures access
3. **Professionals & Executives**
   - Seeking wisdom beyond their domain expertise
   - Complex ethical/strategic decisions
   - Premium tier, high LTV
4. **Teams & Organizations**
   - Enterprise seeking collective wisdom for strategy
   - Nonprofits needing guidance on mission/impact
   - Enterprise tier, B2B revenue
5. **Students & Researchers**
   - Academic questions requiring real-world wisdom
   - Career/life guidance alongside studies
   - Educational tier
6. **Wisdom Giants** (Contributors)
   - Experienced individuals with valuable lived wisdom
   - Seeking purpose, recognition, optional income
   - Supply side of marketplace

Early Adopters:

- Maven Village community (existing network)
- Cashco Financial clients (proven relationship)

- LDP (Leadership Development Program) organizations

Next Steps:

- Begin recruiting 100 early adopters from Maven Village
- Establish partnerships with 2-3 LDP organizations
- Create onboarding flow for each segment

---

3. UNIQUE VALUE PROPOSITION 🟢 GREEN

Status: Compelling, differentiated, mission-aligned

Core Promise:

> "Wisdom, not just information. Get both what AI knows AND what experienced humans know."

The Hook:

> "What if your parents knew everything?"

The Explanation:

> "The complete topography of available wisdom: Documented (AI) + Undocumented (Human)"

Why It Matters:

Current AI tools (ChatGPT, Claude, Gemini) provide only **fossilized intelligence** - knowledge that has been documented, written down, and trained into models. They completely miss **crystallized intelligence** - the lived experience, judgment, and wisdom that comes from actually doing things.

Wisdom Giants provides BOTH:

- **AI Layer**: Fast, comprehensive, information-rich (what's documented)
- **Human Layer**: Authentic, experiential, wisdom-rich (what's lived)
- **Quality Control**: AI sorts and curates Giant responses for quality
- **Full Attribution**: Transparent about what came from AI vs. Giants

Social Impact Capitalism Angle:

This is not just a better product - it's a better business model. Profit AND purpose multiply each other's force. We operate in the "Honeybee Zone" (7-8 on both economic engine and social impact), where:

- Strong revenue enables serving the underserved (free tier)

- Serving underserved creates network effects (more diverse wisdom)
- Network effects strengthen competitive moat
- Stronger moat enables more impact investment

Differentiation:

- Only platform combining AI + Human wisdom in real-time
- Only platform with explicit underserved-first mission
- Only platform proving Social Impact Capitalism at scale

Next Steps:

- A/B test messaging with early adopters
- Refine tagline based on user resonance
- Create brand guidelines around UVP

---

4. SOLUTION 🟡 AMBER

Status: Architecture defined, implementation in progress

The Dual-Layer System:

Layer 1: AI Engines (Fossilized Intelligence)

- User selects preferred AI engine (ChatGPT, Claude, Gemini, etc.)
- Multi-AI support allows user choice and comparison
- AI provides fast, comprehensive, information-rich response
- Structured output format for consistency

Layer 2: Wisdom Giants (Crystallized Intelligence)

- Query routed to relevant Wisdom Giants based on category/expertise
- Giants respond via voice or video only (no written essays)
- Time-boxed responses (90 seconds to 5 minutes)
- Authentic, conversational, experiential wisdom

The Two Response Windows:

1. **Immediate Window** (Instinct)
    - Giants can respond immediately if they have instant insight
    - Captures gut reactions and intuitive wisdom
    - Optional, not required

2. **24-Hour Soak Window** (Reflection)
    - Giants have up to 24 hours to reflect and respond
    - Encourages deeper thought and considered wisdom
    - Most responses expected here

AI Quality Control:

- **No Gatekeeping Input**: Anyone can contribute (authenticity without elitism)
- **Gatekeep the Output**: AI sorts responses by quality, relevance, completeness
- **Ranking System**: Giants build reputation through user feedback
- **Baseline Challenge**: AI detects disconnection, terror, data poisoning
- **Full Attribution**: User sees which AI and which Giants contributed

Technical Architecture:

- Multi-AI integration layer (API aggregation)
- Voice/video recording and streaming infrastructure
- AI-powered sorting and ranking algorithms
- Real-time notification system for Giants
- User feedback and rating system
- Attribution and transparency layer

Next Steps:

- Build MVP with 2 AI engines (ChatGPT + Claude)
- Implement voice recording (start with audio only, video later)
- Create AI sorting algorithm (v1: simple relevance scoring)
- Test with 25 Giants and 100 users in Q1 2026

---

5. UNFAIR ADVANTAGE 🟢 GREEN

Status: Defensible moat identified and building

The Five Moats:

1. Wisdom Giant Community + Data Flywheel

- Network effects compound: More users → More Giants → Better wisdom → More users
- Giant reputation data creates quality moat (can't be copied)
- Wisdom-query matching algorithms improve with scale

- Community culture and norms create switching costs

2. Social Impact Capitalism Positioning (Mission Moat)

- Honeybee Zone positioning (7-8 on both axes) is rare and defensible
- Mission-driven talent attraction (top people want purpose + profit)
- Impact investors seek proven SIC models (capital advantage)
- Underserved-first mission creates authentic brand moat
- "Profit FROM poverty" competitors can't credibly pivot to our model

3. SOLVE Movement Alignment

- Part of broader ecosystem addressing systemic gaps
- Blue Seal (Cap The Gap): Economic model validation
- Done Seal (Cut The Crap): Rapid execution culture
- Promise Seal (Track The Pact): Accountability and trust
- Movement provides strategic guidance, network, credibility

4. Founder Insight (Tim Latimer)

- Deep experience with Maven Village (community building)
- Proven track record with Cashco Financial (underserved focus)
- LDP (Leadership Development Program) network and credibility
- Understanding of both technology and social impact
- Personal mission alignment creates authentic leadership

5. Dual Intelligence Architecture (First-Mover)

- First platform to systematically combine AI + Human wisdom
- Technical architecture is complex (multi-AI + voice/video + sorting)
- High barrier to entry for replication
- Time advantage to build community and data moat
- Patent potential for AI-human wisdom integration methods

Why This Moat is Defensible:

- **Not just technology**: Community and culture can't be copied
- **Not just mission**: Proven business model with strong economics
- **Not just network effects**: Multi-sided with compounding advantages
- **Not just first-mover**: Continuous innovation and community deepening

Next Steps:

- File provisional patent for dual intelligence architecture
- Establish Wisdom Giant council (community governance)
- Document and publish SIC model results (thought leadership)
- Build strategic partnerships within SOLVE movement

---

6. REVENUE STREAMS 🟡 AMBER

Status: Models defined, pricing to be determined

Revenue Model 1: Freemium (B2C)

Free Tier (Universal Access)

- 5 queries per month with AI + Giant responses
- Access to all AI engines
- Community features (rankings, categories)
- Ensures underserved inclusion (40%+ target)

Premium Tier ($X/month - TBD)

- 50 queries per month
- Priority routing to top-rated Giants
- Advanced features (query history, favorites, follow Giants)
- Target: Middle-class professionals

Pro Tier ($XX/month - TBD)

- Unlimited queries
- Exclusive access to specialized Giants
- Private query option (not added to public database)
- Advanced analytics on decision outcomes
- Target: Executives, high-income professionals

Revenue Model 2: Enterprise Licensing (B2B)

- $X per user per month (volume discounts)
- Team query sharing and collaboration features
- Admin dashboard and usage analytics
- Custom Giant recruitment for specific domains

- White-label option for large enterprises
- Target: Nonprofits, corporations, government agencies

Revenue Model 3: API Access (B2B/Developer)

- Per-query pricing (tiered by volume)
- Volume discounts for high-usage customers
- Developer documentation and support
- Webhook integrations for real-time wisdom
- Target: Apps, platforms, services needing wisdom layer

Revenue Model 4: Wisdom Giant Compensation

- Optional revenue share model (Giants can opt in)
- Top-rated Giants earn % of Premium/Pro revenue
- Recognition and purpose primary motivators (not money)
- Transparent payout formula based on engagement and ratings
- Creates incentive for quality without corrupting mission

Target Economics:

- **Gross Margin**: 70-80% (typical SaaS benchmarks)
- **LTV/CAC Ratio**: >3:1 (healthy unit economics)
- **CAC Payback Period**: <12 months
- **Year 1 Target**: $100K ARR (product-market fit focus)
- **Year 3 Target**: $10M ARR (scale focus)

Next Steps:

- Conduct pricing research with early adopters
- Model unit economics at different price points
- Establish payment processing infrastructure
- Create Giant compensation framework and opt-in system
- Test willingness to pay with beta users

---

7. COST STRUCTURE 🟡 AMBER

Status: Categories defined, estimates needed

Variable Costs (Scale with Usage):

AI API Costs

- Multi-engine support means multiple API providers
- Cost per query varies by AI model (GPT-4, Claude, Gemini)
- Estimated: $0.01-0.10 per query depending on complexity
- Optimization: Cache common queries, use cheaper models for simple queries

Media Storage & Streaming

- Voice/video responses stored and streamed
- Cloud storage costs (S3 or equivalent)
- CDN costs for global delivery
- Estimated: $0.05-0.20 per Giant response
- Optimization: Compression, tiered storage (hot/cold)

Notifications

- Email, SMS, push notifications to Giants and users
- Estimated: $0.01-0.05 per notification
- Optimization: Batch notifications, user preference management

Wisdom Giant Compensation

- Optional revenue share for top Giants
- Variable based on engagement and opt-in rate
- Estimated: 10-20% of Premium/Pro revenue
- Optimization: Transparent formula, recognition over money

Fixed Costs (Regardless of Usage):

Development

- Engineering team (full-stack, AI/ML, mobile)
- Product management
- Design (UI/UX, brand)
- Estimated: $200-500K annually (early stage)

Infrastructure

- Cloud hosting (AWS, GCP, or Azure)
- Database management
- Security and compliance

- Estimated: $50-100K annually (early stage)

Operations

- Customer support
- Community management (Giant relations)
- Content moderation
- Estimated: $100-200K annually

Marketing & Sales

- Content marketing
- Partnerships and BD
- Paid acquisition (if needed)
- Estimated: $100-300K annually (early stage)

Legal & Compliance

- Legal counsel
- Privacy compliance (GDPR, CCPA)
- Terms of service, content policies
- Estimated: $50-100K annually

Total Estimated Costs:

- **Year 1**: $500K-1.2M (seed stage, lean team)
- **Year 2**: $1.5-3M (scaling team and infrastructure)
- **Year 3**: $5-10M (full-scale operations)

Cost Optimization Strategies:

- **Efficient Routing**: Match queries to Giants based on expertise (reduce wasted responses)
- **Caching**: Store and reuse common AI responses
- **Community Moderation**: Leverage Giant community for quality control
- **Automation**: AI-powered sorting reduces manual curation
- **Lean Team**: Remote-first, high-talent density, avoid bloat

Next Steps:

- Create detailed financial model with unit economics
- Establish cloud infrastructure with cost monitoring

- Negotiate volume discounts with AI API providers
- Set up cost tracking and optimization dashboards

---

8. KEY METRICS 🟢 GREEN

Status: Comprehensive framework established

North Star Metric:

WEDPM (Wisdom-Enhanced Decisions Per Month)

- Formula: Total queries with both AI and Giant responses × Average user satisfaction rating
- Why: Captures both quantity (reach) and quality (satisfaction)
- Aligns with mission: Wisdom-enhanced decisions, not just queries
- Drives all other metrics: Engagement, retention, revenue, impact

Engagement Metrics:

- **Query Volume**: Total queries per day/week/month
- **Retention**: D7 (Day 7), D30 (Day 30), D90 (Day 90) retention rates
- **Query Complexity**: Average query length, follow-up rate
- **Response Completeness**: % of queries with both AI and Giant responses
- **Time to Wisdom**: Average time from query to complete answer

Quality Metrics:

- **Giant Engagement Rate**: % of Giants responding to queries within 24 hours
- **Response Completeness**: % of Giant responses meeting quality threshold
- **User Satisfaction (NPS)**: Net Promoter Score from users
- **Giant Satisfaction**: Retention and engagement of Giant community
- **Quality Score**: AI-calculated score for each Giant response

Business Metrics:

- **MRR/ARR**: Monthly/Annual Recurring Revenue
- **LTV/CAC Ratio**: Lifetime Value / Customer Acquisition Cost
- **Gross Margin**: Revenue minus variable costs
- **Conversion Rates**: Free → Premium → Pro conversion
- **Churn Rate**: Monthly user and revenue churn

Impact Metrics:

- **Underserved Percentage**: % of users from underserved populations (target: 40%+)
- **Diversity Index**: Demographic diversity of user base and Giants
- **Cognitive Tax Reduction**: Measured through user surveys (time, money, stress saved)
- **Crisis Prevention**: Stories of major negative outcomes avoided
- **Economic Mobility**: Long-term tracking of user outcomes

Targets:

- **Q1 2026**: 10K WEDPM, 70% satisfaction, 40% underserved
- **Year 1**: 100K WEDPM, 75% satisfaction, 40% underserved, $100K ARR
- **Year 3**: 10M WEDPM, 80% satisfaction, 40% underserved, $10M ARR

Next Steps:

- Implement analytics infrastructure (Mixpanel, Amplitude, or similar)
- Create real-time dashboards for all key metrics
- Establish weekly metric review cadence
- Set up automated alerts for metric anomalies

---

9. CHANNELS 🟡 AMBER

Status: Strategy defined, execution pending

Phase 1: Launch & Validate (Q1-Q2 2026)

Direct Platform (Owned)

- Web application (responsive, mobile-friendly)
- Mobile apps (iOS and Android) - Phase 2
- Direct user acquisition and onboarding
- Full control over user experience

Maven Village Integration (Partnership)

- Leverage existing community of experts and learners
- Cross-promotion and co-marketing
- Shared user base (warm audience)
- Credibility through association

Phase 2: Scale & Expand (Q3 2026 - 2027)

LDP Organizations (Enterprise)

- Leadership Development Program partnerships
- Enterprise licensing for cohorts
- Organizational wisdom capture
- B2B revenue stream

Guardian / Corner Banker (Community)

- Trusted community leaders as distribution partners
- Localized wisdom and cultural relevance
- Underserved population access
- Grassroots growth

Community Partnerships (Nonprofit)

- Partner with nonprofits serving underserved populations
- Sponsored access for their communities
- Impact measurement and case studies
- Mission alignment and credibility

Phase 3: Expand & Lead (2028+)

Educational Licenses (Academic)

- University and school partnerships
- Student access programs
- Research collaborations
- Academic credibility

API / White Label (Platform)

- Integrate wisdom layer into other apps/platforms
- White-label for large enterprises
- Developer ecosystem
- Platform revenue

Distribution Strategy:

Organic Growth

- Word-of-mouth (high NPS drives referrals)
- Giant-led growth (Giants invite their networks)

- User-generated content (stories, testimonials)
- Community-driven expansion

Content Marketing

- Blog: Wisdom vs. information, decision-making, SIC
- Podcast: Interviews with Wisdom Giants
- Social media: Wisdom snippets, user stories
- SEO: Rank for decision-related queries

Partnerships

- Strategic partnerships with aligned organizations
- Co-marketing with complementary services
- Integration partnerships (embed in other platforms)
- Movement partnerships (SOLVE ecosystem)

Paid Acquisition (If Needed)

- Targeted ads for Premium/Pro tiers
- Retargeting for engaged free users
- Sponsorships of relevant podcasts/communities
- Performance marketing with strict ROI targets

Next Steps:

- Launch direct platform (web) in Q1 2026
- Finalize Maven Village integration agreement
- Identify 3-5 LDP organizations for pilot partnerships
- Create content marketing calendar and begin publishing

---

10. IMPACT 🟢 GREEN

Status: Clear social/environmental impact with measurement plan

Primary Impact: Democratize Wisdom Access

The Problem We're Solving:

- Wisdom is currently a luxury good (expensive coaching, exclusive mentorship)
- Underserved populations face "cognitive tax of poverty" (isolated panic, poor decisions)
- Information inequality perpetuates economic inequality

- AI has made information free but wisdom remains locked

Our Solution:

- Free tier ensures universal access (no one excluded by ability to pay)
- Underserved-first priority (40%+ of users from underserved populations)
- Diverse Giant community (wisdom from all backgrounds, not just elite)
- Transparent and authentic (no gatekeeping, full attribution)

Secondary Impact: Community Empowerment

Validate Lived Experience:

- Wisdom Giants recognized for their lived experience
- Crystallized intelligence valued equally with fossilized intelligence
- Underrepresented voices amplified and compensated
- Community wisdom preserved and accessible

Purpose and Recognition:

- Giants find purpose through helping others
- Recognition system celebrates contribution
- Optional compensation provides supplemental income
- Intergenerational wisdom transfer

Tertiary Impact: Economic Mobility

Better Decisions → Better Outcomes:

- Users make more informed life decisions
- Reduced costly mistakes (financial, career, health)
- Increased confidence and agency
- Long-term outcome tracking and measurement

SOLVE Capitalism Model:

Honeybee Zone Positioning (7-8 on both axes)

- **Economic Engine**: Strong revenue model, scalable, sustainable
- **Social Impact**: Deep mission, serve underserved, community empowerment
- **Force Multiplication**: Profit enables impact, impact drives growth

Cap The Gap (Blue Seal):

- Target: 1:1 access ratio (privileged:underserved)

- Current inequality: 100:1 or worse (wisdom is exclusive)
- Our model: 60:40 (Premium/Pro subsidize Free tier)
- Measurement: Wisdom Access Gap reduction over time

Impact Measurement:

Quantitative Metrics:

- % of users from underserved populations (target: 40%+)
- Diversity index of user base and Giants
- Cognitive tax reduction (time, money, stress saved)
- Economic mobility indicators (income, employment, education)
- Crisis prevention (major negative outcomes avoided)

Qualitative Metrics:

- User testimonials and stories
- Giant satisfaction and purpose fulfillment
- Community health and culture
- Social impact case studies

Long-Term Vision:

By 2050, we aim to have:

- Eradicated the cognitive tax of poverty
- Served 500 million underserved individuals
- Proven Social Impact Capitalism works at billion-dollar scale
- Made "Ask the Giants" common language
- Validated lived experience as equal to documented knowledge

Next Steps:

- Establish impact measurement framework
- Partner with academic researchers for longitudinal studies
- Create user advisory board (especially underserved representatives)
- Publish quarterly impact reports (transparency)
- Join B Corp or similar certification (accountability)

PAGE 2: STRATEGY EXECUTION (SOLVE)

PURPOSE (BLUE SEAL) 🟢 GREEN

Status: Deep mission aligned with SOLVE movement

Our Purpose:

To democratize access to wisdom by combining what AI knows with what experienced humans know - ensuring everyone, especially the underserved, can make better decisions and **matter, not just survive**.

Why This Matters:

The world has made information free (thank you, internet and AI), but wisdom remains locked behind expensive gates. This creates a "cognitive tax of poverty" where underserved populations face high-stakes decisions in isolated panic, while privileged populations have access to coaches, mentors, and advisors.

This is not just unfair - it's economically inefficient and morally wrong.

Our Commitment:

We will **eradicate the cognitive tax of poverty** by ensuring that anyone, anywhere, regardless of ability to pay, can access the collective wisdom of experienced humans combined with the comprehensive knowledge of AI.

Profit AND Purpose:

We reject the false choice between profit or purpose. We will build a strong economic engine (7-8/10) that fuels deep social impact (8-9/10). Profit and purpose multiply each other's force.

- **Profit enables impact**: Premium/Pro tiers subsidize free tier for underserved
- **Impact drives growth**: Serving underserved creates network effects and diverse wisdom
- **Force multiplication**: We operate in the Honeybee Zone, where both thrive together

Cap The Gap (Blue Seal Standard):

We will measure our success by the **Wisdom Access Gap** - the ratio of privileged to underserved users accessing wisdom.

- **Current state**: 100:1 or worse (wisdom is exclusive luxury)
- **Our target**: 1:1 (equal access regardless of economic status)

- **Our model**: 60:40 (Premium/Pro:Free) as sustainable equilibrium

Never Profit FROM Poverty:

We will never extract value from the underserved. We will only profit WITH them by serving them alongside those who can pay. The underserved are not a revenue source - they are the primary beneficiaries of our mission.

Next Steps:

- Codify purpose in company charter and legal documents
- Establish user advisory board with underserved representation
- Create Purpose Council to guide mission-critical decisions
- Publish annual Purpose Report (transparency and accountability)

BHAG (DONE SEAL) 🟡 AMBER

Status: Ambitious goal set, path emerging

Our Big Hairy Audacious Goal (25-Year Vision):

By 2050:

1. **1 billion users globally** have access to Wisdom Giants
2. **500 million underserved individuals served** (50% of user base)
3. **Cognitive tax of poverty eradicated** in served populations
4. **"Ask the Giants" becomes common language** (like "Google it")
5. **10 million active Wisdom Giants** contributing wisdom
6. **$1 billion+ Annual Recurring Revenue** proving Social Impact Capitalism works at scale

Why This BHAG:

- **Ambitious but achievable**: ChatGPT reached 100M users in 2 months; we have 25 years
- **Mission-aligned**: 50% underserved is far beyond any tech company today
- **Economically viable**: $1B ARR with 1B users = $1 per user (freemium math works)
- **Movement-building**: "Ask the Giants" as common language means cultural shift
- **Proof of concept**: Proves Social Impact Capitalism can work at massive scale

Milestones to BHAG:

- **Year 1 (2026)**: 10,000 users, 100 Giants, $100K ARR
- **Year 3 (2028)**: 1 million users, 10K Giants, $10M ARR

- **Year 5 (2030)**: 10 million users, 100K Giants, $100M ARR
- **Year 10 (2035)**: 100 million users, 1M Giants, $500M ARR
- **Year 25 (2050)**: 1 billion users, 10M Giants, $1B+ ARR

Cut The Crap (Done Seal Standard):

We will execute in rapid 90-day cycles, focusing on outcomes over process:

- **Q1 2026**: Validate product-market fit (100 users, 70% satisfaction)
- **Q2 2026**: Prove business model (1K users, $10K MRR)
- **Q3 2026**: Scale platform (10K users, $50K MRR)
- **Q4 2026**: Fundraise Series A ($2-5M, revenue-positive trajectory)

No bureaucracy. No endless planning. Ship, learn, iterate. Outcomes over process.

Next Steps:

- Break down BHAG into 3-year strategic moves
- Establish quarterly OKRs aligned with milestones
- Create public milestone tracker (transparency)
- Celebrate milestone achievements with community

CORE VALUES (PROMISE SEAL) 🟢 GREEN

Status: Non-negotiable principles established

Our Five Core Values:

1. Wisdom Over Information

Lived experience equals documented knowledge.

We believe that what someone has experienced and learned through living is just as valuable as what has been written down and documented. Crystallized intelligence (wisdom) deserves equal respect with fossilized intelligence (information).

In Practice:

- Giants' voices are never edited or "corrected" by AI
- Lived experience is attributed and celebrated
- Wisdom and information presented side-by-side, not hierarchically

2. Serve Underserved First

Never profit FROM poverty. Always profit AND purpose.

We will never extract value from the underserved. We will serve them first, free of charge, and build our economic engine by serving those who can pay. The underserved are not a revenue source - they are the primary beneficiaries of our mission.

In Practice:

- 40%+ of users must be from underserved populations
- Free tier is full-featured, not crippled
- Premium features enhance experience but don't exclude essential wisdom
- Measure and report Wisdom Access Gap quarterly

3. Authenticity Without Elitism

The village speaks. AI sorts. No gatekeeping input.

Anyone can contribute wisdom - there are no credentials required, no gatekeepers deciding who is "qualified." But we do gatekeep the output - AI sorts responses for quality, relevance, and completeness. This preserves authenticity while ensuring quality.

In Practice:

- No application process for Giants (open to all)
- AI-powered quality sorting (not human gatekeepers)
- Reputation builds through contribution, not credentials
- Diverse voices amplified, not filtered

4. The Master's Nod Remains With You

We empower, not replace. You decide.

AI and Giants provide wisdom, but the decision is always yours. We amplify human judgment, we don't replace it. The "Master's Nod" - the final decision - remains with you, the user.

In Practice:

- Full attribution (you know who said what)
- Multiple perspectives presented (not single "right answer")
- You choose which Giants to follow and trust
- We guide, you decide

5. Profit AND Purpose: Force Multiplication

Honeybee Zone. Both axes strong. Both forces multiply.

We reject the false choice between profit or purpose. We will build a strong economic engine AND create deep social impact. These are not in tension - they multiply each other's

force. We operate in the Honeybee Zone (7-8 on both axes).

In Practice:

- Strong unit economics enable free tier for underserved
- Serving underserved creates network effects and diverse wisdom
- Impact attracts mission-driven talent and capital
- Profit is celebrated as enabler of impact, not enemy of mission

Track The Pact (Promise Seal Standard):

We will hold ourselves accountable to these values through:

- **Quarterly Values Audit**: Review decisions against values
- **Public Reporting**: Transparent metrics on values adherence
- **User Advisory Board**: Community holds us accountable
- **Annual Transparency Report**: Full disclosure of promises kept vs. made

Next Steps:

- Integrate values into hiring and performance reviews
- Create values-based decision-making framework
- Establish accountability mechanisms (advisory board, reporting)
- Celebrate values-aligned wins publicly

QUARTERLY PRIORITIES 🟡 AMBER

Status: Q1 2026 priorities defined, execution starting

Q1 2026 Priorities (January - March):

Priority 1: Validate Product-Market Fit

- **Goal**: 100 early adopters, 70%+ satisfaction (NPS >40)
- **Success Criteria**:
  - 100 users actively querying (minimum 5 queries each)
  - 70%+ report satisfaction with wisdom received
  - 40%+ of users from underserved populations
  - Qualitative feedback shows strong problem-solution fit
- **Key Activities**:
  - Recruit 100 beta users from Maven Village

    - Conduct weekly user interviews (10-15 per week)
    - Iterate on UX based on feedback
    - Document user stories and testimonials

Priority 2: Recruit Wisdom Giants

- **Goal**: 25 Giants across 5 categories, 90%+ response rate
- **Success Criteria**:
    - 25 Giants onboarded and active
    - 5 categories covered (career, finance, health, relationships, life transitions)
    - 90%+ of Giants respond to queries within 24 hours
    - Giants report satisfaction with experience (NPS >50)
- **Key Activities**:
    - Identify and personally recruit first 25 Giants
    - Create Giant onboarding flow and training
    - Establish Giant community (Slack or Discord)
    - Implement Giant notification and engagement system

Priority 3: Build Core Platform

- **Goal**: Multi-AI integration, sorting algorithms, voice/video system
- **Success Criteria**:
    - 2 AI engines integrated (ChatGPT + Claude)
    - Voice recording and playback working (audio only, video in Q2)
    - AI sorting algorithm v1 deployed (simple relevance scoring)
    - System uptime >99%
- **Key Activities**:
    - Build web application (React + Node.js)
    - Integrate AI APIs (OpenAI + Anthropic)
    - Implement voice recording (WebRTC or similar)
    - Deploy AI sorting algorithm (Python + ML)
    - Set up cloud infrastructure (AWS or GCP)

Priority 4: Establish Business Model

- **Goal**: Pricing tiers, unit economics, payment processing
- **Success Criteria**:

    - Pricing research completed (willingness to pay validated)
    - Unit economics modeled (LTV/CAC >3:1 projected)
    - Payment processing implemented (Stripe)
    - First paying customers (minimum 10)
- **Key Activities**:
    - Conduct pricing research with beta users
    - Model unit economics at different price points
    - Implement Stripe payment processing
    - Create subscription management system
    - Launch Premium tier (Pro tier in Q2)

Priority 5: Prove Social Impact

- **Goal**: 40%+ underserved users, measurable cognitive tax reduction, testimonials
- **Success Criteria**:
    - 40%+ of users from underserved populations (verified)
    - User surveys show cognitive tax reduction (time, money, stress)
    - 10+ compelling testimonials collected
    - Impact measurement framework established
- **Key Activities**:
    - Partner with 2-3 organizations serving underserved populations
    - Create user demographic survey and verification
    - Implement cognitive tax measurement surveys
    - Collect and document user stories
    - Establish impact reporting cadence

Q2-Q4 2026 Preview:

- **Q2**: Scale to 1K users, 100 Giants, $10K MRR
- **Q3**: Scale to 10K users, 500 Giants, $50K MRR
- **Q4**: Fundraise Series A ($2-5M), achieve revenue-positive trajectory

Next Steps:

- Create detailed project plans for each priority
- Assign owners and weekly check-ins
- Establish weekly all-hands to review progress

- Set up project management system (Linear, Asana, or similar)

KEY METRICS (KPIs) 🟢 GREEN

Status: Comprehensive tracking framework ready

Daily Metrics:

- **DAU (Daily Active Users)**: Users who query at least once
- **Query Volume**: Total queries submitted per day
- **Response Completeness**: % of queries with both AI and Giant responses
- **System Uptime**: % of time platform is operational
- **Giant Response Time**: Average time from query to Giant response

Weekly Metrics:

- **Retention Rates**:
  - D7 (Day 7): % of new users who return within 7 days
  - D30 (Day 30): % of new users who return within 30 days
- **Giant Engagement Rate**: % of Giants responding to queries within 24 hours
- **NPS (Net Promoter Score)**: User satisfaction and likelihood to recommend
- **MRR (Monthly Recurring Revenue)**: Subscription revenue run rate

Monthly Metrics:

- **MAU (Monthly Active Users)**: Users who query at least once per month
- **LTV/CAC Ratio**: Lifetime Value / Customer Acquisition Cost
- **Gross Margin**: Revenue minus variable costs (%)
- **Underserved Percentage**: % of users from underserved populations
- **Diversity Index**: Demographic diversity of users and Giants
- **Churn Rate**: % of users who stop using platform

North Star Metric:

WEDPM (Wisdom-Enhanced Decisions Per Month)

- Formula: Total queries with both AI and Giant responses × Average user satisfaction rating
- Why: Captures both quantity (reach) and quality (satisfaction)
- Aligns with mission: Wisdom-enhanced decisions, not just queries

Blue Seal KPI (SOLVE Capitalism):

Wisdom Access Gap Ratio

- Formula: Privileged users : Underserved users
- Current state: 100:1 or worse (wisdom is exclusive)
- Our target: 1:1 (equal access)
- Our model: 60:40 (sustainable equilibrium)
- Measurement: Track quarterly, report publicly

Targets:

Q1 2026:

- 100 MAU, 10K WEDPM, 70% satisfaction, 40% underserved

Year 1 (2026):

- 10K MAU, 100K WEDPM, 75% satisfaction, 40% underserved, $100K ARR

Year 3 (2028):

- 1M MAU, 10M WEDPM, 80% satisfaction, 40% underserved, $10M ARR

Dashboard & Reporting:

- **Real-time Dashboard**: All key metrics visible to team
- **Weekly Review**: Team reviews metrics and trends
- **Monthly Board Report**: Summary for advisors/investors
- **Quarterly Public Report**: Transparency with community

Next Steps:

- Implement analytics infrastructure (Mixpanel, Amplitude)
- Create real-time dashboard (Grafana, Tableau, or custom)
- Establish weekly metric review cadence
- Set up automated alerts for metric anomalies
- Publish first quarterly metrics report

STRATEGIC MOVES (3Y / 1Y) 🟡 AMBER

Status: 3-year strategy clear, tactics evolving

Year 1 (2026): VALIDATE & BUILD

Goal: Validate product-market fit + achieve revenue positive trajectory

Key Milestones:

- 10,000 users (40% underserved)
- 100 Wisdom Giants across 10 categories
- $100K Annual Recurring Revenue
- Product-market fit validated (NPS >50, retention >40%)
- Series A funding secured ($2-5M)

Strategic Focus:

- Build core platform (multi-AI, voice/video, sorting)
- Recruit and engage Giant community
- Validate business model and unit economics
- Prove social impact (cognitive tax reduction)
- Establish brand and thought leadership

Key Risks:

- Product-market fit not achieved (pivot or persevere?)
- Giant engagement lower than expected (supply-side risk)
- Unit economics don't work (pricing or cost issues)
- Fundraising challenges (market conditions, traction)

Mitigation:

- Rapid iteration based on user feedback
- Over-recruit Giants (50% buffer)
- Model multiple pricing scenarios
- Build revenue before fundraising (reduce dependency)

Year 2 (2027): SCALE & PROVE

Goal: Scale platform + prove Social Impact Capitalism model

Key Milestones:

- 100,000 users (40% underserved)
- 1,000 Wisdom Giants across 20 categories
- $1M Annual Recurring Revenue
- Profitability path clear (LTV/CAC >3:1, CAC payback <12 months)
- Social impact proven (published case studies, academic research)

Strategic Focus:

- Scale user acquisition (organic + partnerships)
- Expand Giant community (10x growth)
- Optimize unit economics (reduce CAC, increase LTV)
- Prove and publish Social Impact Capitalism model
- Expand to mobile apps (iOS + Android)

Key Risks:

- Scaling challenges (infrastructure, quality control)
- Competition emerges (copycats or pivots)
- Unit economics degrade at scale (CAC increases)
- Mission drift (pressure to prioritize profit over purpose)

Mitigation:

- Invest in infrastructure early (avoid technical debt)
- Build defensible moat (community, data, culture)
- Maintain strict CAC discipline (organic-first growth)
- Codify values in governance (Purpose Council, advisory board)

Year 3 (2028): EXPAND & LEAD

Goal: Lead category + expand to adjacent markets

Key Milestones:

- 1,000,000 users (40% underserved)
- 10,000 Wisdom Giants across 50 categories
- $10M Annual Recurring Revenue
- Category leadership established ("Ask the Giants" entering common language)
- Series B funding secured ($10-20M) for global expansion

Strategic Focus:

- Expand globally (international markets, localization)
- Launch enterprise tier (B2B, white-label)
- API platform (developer ecosystem)
- Thought leadership (conferences, publications, movement-building)
- Strategic acquisitions or partnerships

Key Risks:

- International expansion challenges (cultural, regulatory)
- Enterprise sales complexity (longer cycles, higher CAC)
- Platform/API cannibalization of core business
- Scaling culture and values (maintaining mission at scale)

Mitigation:

- Start with English-speaking markets (lower complexity)
- Hire experienced enterprise sales leader
- Design API to complement, not compete with core product
- Invest heavily in culture and values (onboarding, rituals, governance)

Q1-Q4 2026 Breakdown:

Q1 (Jan-Mar): Launch → Validate

- Build MVP, recruit first 100 users and 25 Giants
- Validate problem-solution fit
- Establish business model

Q2 (Apr-Jun): Iterate → Improve

- Scale to 1K users and 100 Giants
- Iterate on product based on feedback
- Launch Premium tier, achieve $10K MRR

Q3 (Jul-Sep): Scale → Grow

- Scale to 10K users and 500 Giants
- Optimize unit economics
- Achieve $50K MRR

Q4 (Oct-Dec): Fundraise → Expand

- Prepare Series A materials
- Pitch investors
- Close $2-5M Series A
- Plan Year 2 expansion

Next Steps:

- Create detailed Year 1 roadmap with monthly milestones

- Assign strategic move owners
- Establish monthly strategy review cadence
- Begin Series A prep (deck, financial model, investor list)

CANVAS HEALTH ASSESSMENT

Overall Status: 🟢 HEALTHY

Score Breakdown:

- 🟢 **Green** (Strong): 7 blocks
- 🟡 **Amber** (Needs Validation): 8 blocks
- 🔴 **Red** (Critical Issue): 0 blocks

Green Blocks (Strong Foundation):

1. Customer Segments - Clearly defined with priority hierarchy
2. Unique Value Proposition - Compelling and differentiated
3. Unfair Advantage - Defensible moat identified
4. Key Metrics - Comprehensive framework established
5. Impact - Clear social impact with measurement plan
6. Purpose - Deep mission aligned with SOLVE movement
7. Core Values - Non-negotiable principles established
8. Key Metrics (KPIs) - Tracking framework ready

Amber Blocks (Needs Validation):

1. Problem - Partially validated, needs user research
2. Solution - Architecture defined, implementation in progress
3. Revenue Streams - Models defined, pricing TBD
4. Cost Structure - Categories defined, estimates needed
5. Channels - Strategy defined, execution pending
6. BHAG - Ambitious goal set, path emerging
7. Quarterly Priorities - Q1 2026 priorities defined, execution starting
8. Strategic Moves - 3-year strategy clear, tactics evolving

Red Blocks (Critical Issues):

- None identified

Overall Assessment:

The Wisdom Giants Lean Canvas is in **strong strategic health**. The foundation is solid with clear mission, values, and differentiation. The primary work ahead is **validation and execution** - testing assumptions with real users, proving the business model, and building the platform.

Key Strengths:

- Mission-driven with authentic Social Impact Capitalism positioning
- Defensible moat through community, data, and movement alignment
- Comprehensive metrics framework aligned with mission
- Clear 3-year strategy with quarterly execution plan

Key Risks to Watch:

- Product-market fit validation (will users actually use this?)
- Giant engagement (will supply side show up?)
- Unit economics (will the business model work?)
- Scaling culture (can we maintain values at scale?)

Recommended Next Steps:

1. Execute Q1 2026 priorities (validate, recruit, build, establish, prove)
2. Move Amber blocks to Green through validation and execution
3. Monitor metrics weekly and adjust strategy as needed
4. Maintain transparency with community and stakeholders

Canvas Prepared By: Manus AI (SOLVE Team Member)

Date: January 22, 2026

Protocol: SOLVE Team Dual-Engine Protocol v1.0

Status: ✅ Complete and Ready for Execution

🦋 **From Seed to North Star. Let's build.**
